balancing, monitoring, and
more.

[EXPLORE R6](#)

FAST, SECURE, & SCALABLE APPLICATION DELIVERY FOR WEB AND MOBILE

Building a great application is just the beginning.
NGINX Plus delivers your application fast and securely.

Load balancer

NGINX Plus provides high-performance load balancing, session persistence and TCP load balancing to optimize availability of apps, APIs and services.

[Learn more ›](#)

Web server

NGINX Plus is a high-performance HTTP server, delivering web and video assets with unparalleled speed, maximizing performance and efficiency.

[Learn more ›](#)

Content caching

NGINX Plus is used as a content cache, both to accelerate local origin servers and to create edge servers for content delivery networks.

[Learn more >](#)

Streaming media

NGINX Plus is a proven solution used by high-traffic websites to stream video content to any device.
